

EVPP 646/647:

Wetland Ecology and Management

INSTRUCTOR:
Dr. C. Ahn

FALL 2021
4 CREDITS

LECTURE
THURSDAYS
4:30 - 7:10 PM

LAB
SATURDAYS
9 AM - 1 PM

This course emphasizes structure, functions, and ecological processes of natural and constructed wetlands from an ecosystem perspective. Students will be expected to develop an understanding of hydrologic, physicochemical, ecological, and cultural aspects of wetlands and the management of these systems through in-class and field/lab works.
